About the Program

The increasing need for Criminal Intelligence Analysis Training has become recognized over the past few years as law enforcement agencies have had to investigate diverse criminal conspiracies ranging from the importation and distribution of narcotics to money laundering and terrorism. Although originally developed to assist intelligence units deal with organized crime, criminal investigators and the analysts who support them have found a number of specialized tools to be extraordinarily useful in the management of other complex cases and the presentation of these cases in court. Today, law enforcement personnel can use these techniques to investigate not only the types of conspiracies mentioned above, but cases involving homicide, street gangs, economic fraud, and political corruption as well.

This is a one-week (36 hours) “hands-on” program that provides you with techniques you can use immediately to solve the real-world problems that daily confront the law enforcement community. Once trained, you will be able to identify the individuals in a conspiracy and determine their relationships to one another, effectively track and monitor criminal events, establish the sources and distribution of funds necessary to underwrite conspiratorial activities, and identify the financial gain realized from a wide variety of illegal operations.

Presented in a comfortable, non-threatening environment that permits both individualized and group instruction, the training takes a “**learn-by-doing**” approach that gives you many opportunities to **actually perform the tasks** associated with criminal intelligence analysis work. You will learn how to prepare the types of link analysis, time/event analyses, and economic analyses which have proven themselves effective in homicide and robbery investigations and in activities involving organized crime, terrorism, economic crime, narcotics, and the criminal actions of today’s street gangs. Extensive use of “**hands-on**” exercises will enhance your ability to manage complex data, identify missing case elements, and develop suspect leads. This format of instruction allows for not only a highly effective interactive exchange between the student and the facilitator, but offers unique opportunities for group interaction and collaboration as well.

You Should Attend IF:

- You are a recently-employed investigator or crime or intelligence analyst assigned to narcotics, counter terrorism, political corruption, or financial laundering cases
- You are an experienced analyst or investigator who has received little of the formal training necessary to fully develop your analytical skills
- You now—or may later—supervise analysis personnel
- You are employed by a prosecution unit that prepares the types of cases described above

Regardless of your previous experience with analytical methods, this course is for you. You can always do your job better when you apply fresh ideas and techniques. We’ve made sure our seminars give you exactly what you need to put you at your peak!

What You Will Learn

This course will provide you with an arsenal of techniques you can use to organize and analyze crime data, identify conspiratorial Activities, establish relationships between people and organizations, and effectively present your findings in criminal court proceedings.

You’ll learn how to develop and use intelligence at the specialized **investigative unit level** to plan and direct investigative attention in combating criminal activities, at the **department level** to facilitate the operational and administrative decision-making process, and at the **central or regional level** to project national and international trends.

Designed for all federal, state, municipal, and military intelligence officers and analysts this course will demystify essential professional skills involving:

About Our Criminal Intelligence Analysis Program

Law enforcement officials send their sworn officers and civilian personnel to our criminal intelligence analysis courses because of our proven ability to provide them with high-quality, performance-oriented training. Class exercises are based on real-world crime problems investigators and analysts are expected to solve each day. As such, students return to their agencies with not only the knowledge of **what** they should do, but, more importantly, **how** they should do it. Skills are developed by instructors who are intimately familiar with criminal intelligence analysis techniques, and by the students' use of our **comprehensive, easy-to-understand course materials**. These elements contribute to the continued popularity of our criminal intelligence analysis training programs. Our success, however, comes from our achievement of one important goal: *We turn Theory Into Practice.*™

What Others Say About Our Training

"Warren Sweeney presents an EXCELLENT course. Packed with many useful techniques and analytical methods. It provides a tremendous and helpful learning experience for all participants."

"The intelligence analysis problems and solutions presented were superb....really allowed us to see how experience when combined with analytical methods can be developed to a fine art."

"Warren presents analytical techniques in a clear and thorough manner. Additionally, the class exercises are an excellent medium for practicing what we learn."

"Really enjoyed the Theory-Example-Practice format of the course. It was a well-prepared, well-presented program. Thanks for the positive experience!"

"The charting techniques and intelligence briefing portions of the course were extremely useful! They provided an excellent summary of the information presented throughout the program."

About the Crime and Intelligence Certification Program

All participants in the Criminal Intelligence Analysis Training Course are eligible to have their coursework credited toward the attainment of a Certificate Award in Crime and Intelligence Analysis (CCIA) and their CCIA Credential. This program is sponsored by the California Department of Justice and the California State Universities. Students who complete all credential requirements will receive a certificate from California State University, Sacramento to verify their academic achievement. The California Department of Justice, in recognition of the University Award, will subsequently bestow the title of Certified Crime Analyst upon, and grant the credential to, all students who successfully complete the credential program. Please see the section in this brochure entitled "Continuing Education Units."

About The Alpha Group

The Alpha Group is comprised of professional speakers, trainers, and researchers who provide their expertise and practical experience to criminal justice, public safety and victim service organizations. The organization is widely recognized for its ability to provide training in crime and intelligence analysis, criminal investigative analysis, statement analysis, homeland security and terrorism analysis, workload analysis, grantsmanship, automated information system development and design, and other such unique areas of law enforcement. We also recognize that those who serve the public often have unique needs themselves. We, therefore, present a variety of management, supervisory, and interpersonal communications seminars. All of our skill-building programs address the personal needs of those - at all levels - who are employed in the public safety and victim service professions.

About Your Trainer

Warren J. Sweeney began his law enforcement career with the Royal Canadian Mounted Police (RCMP) in 1968. He performed general police duties in the Province of Saskatchewan until 1972 at which time he transferred into the RCMP Security Service and was assigned to Counter-Espionage duties in Toronto, Ontario. Warren's analytical career began with his transfer to the Security Service's International Terrorism Unit and his investigation of Middle East terrorist organizations. In 1984 he transferred to the Terrorism Desk within the National Criminal Intelligence Branch of the RCMP, and for five years worked on Sikh Extremism and the investigation of Air India Flight #182.

With his noted facility for teaching, Warren was appointed Intelligence Analysis Coordinator for the RCMP Canadian Police College in 1990. In his role as an instructor he has taught intelligence courses in the Czech Republic, Jamaica, to members of 15 Caribbean Countries, and to the Haitian Police. An internationally recognized authority in the fields of terrorism and organized crime at the local and national level, Warren has also given presentations in Strategic Intelligence Analysis Unit of Interpol in Lyon, France.

Warren Sweeney is a certified Crime and Intelligence Analyst and the former Director of Training, Education and Career Development for the International Association of Intelligence Analysts, Inc. (IALEIA). He also serves as President of the National chapter of IALEIA in Ottawa, Ontario.
