## **Welcome to our Crime Analysis Applications Course**

My name is Steve Gottlieb, and on behalf of The Alpha Group Center and AFAQ for Leadership Development, it is our pleasure to Welcome you to the Crime Analysis Applications Course!

I think you will find this to be a very interesting, educational and enjoyable program. Throughout the week we will learn how to design, develop, implement and operate a dynamic crime analysis program, and how to use a variety of tips and analytical techniques to forecast the day, date, time and location criminals are likely to strike again. I have also prepared some tools and templates for you to take home that should enhance your efficiency and effectiveness upon your return to work.

I'm looking forward to a good time of learning and information sharing with you this week, and to helping you enhance your crime suppression and criminal detection efforts.

Best wishes for much success!

Sincerely,

Steve Gottlieb  
Executive Director  
The Alpha Group
